

Diasbytes BV - Fulltime Full Stack Web Developer

Job description

Diasbytes is a Belgian software company, specialized in cloud document management software and solutions. With our own developed software, we offer companies a solution to optimize various administrative matters. To support our team and increase our customer satisfaction, we are looking for a full-time full stack web developer with a passion for digital solutions.

Your task package consists of:

- Front-end development (React)
- Back-end development (Node.js)
- Managing a database (MySQL)

Profile

What is expected of you as a Full Stack Web Developer?

- Hands-on mentality
- You are punctual and solution-oriented
- You know how to convert requirements into solutions
- You enjoy working in a team but can successfully complete tasks individually
- You can handle Typescript well
- Words such as MySql, Docker, Kubernetes, Git, Elastic, Node, React, ... sound like music to your ears

Jobrelated competencies

- Programming in a computer language
- Analyze technical and functional problems
- Suggest corrective actions and technical adjustments
- Present a developed product and inform users

Offer

What can you expect from us?

- Varied team with a nice atmosphere, sufficient variation between hard work and relaxation and with attention to a healthy work-life balance
- Challenging job with responsibility and the opportunity to grow together with the company
- Competitive compensation and all the necessary tools to do your job
- Permanent contract
- Flexible hours
- Possibility to work from home
- Mobility allowance
- No collective leave
